

« Dematerialize your EDI bills »

GALION DEMAT is a Galion Automotive module. It offers the possibility to save paperless EDI bills.

Designed as an extension of the EDI Manager module, it saves automatically sent and received EDI bills, regardless of the standard (EDIFACT, ODETTE, VDA, ANSI X12).

It also offers means of search, viewing and editing of those bills.

Goals

- To have a backup tool for EDI documents integrated into EDI Manager.
- To save in a transparent way the wanted Invoices.
- To manage the DEMAT module without a link with Galion after some time.

Use

- Have an EDI Manager
- Manage the customers' EDI in all standards
- Report the transition to dematerialization
- No more paper edition

Six good reasons to adopt it

- Easy to set up
- Integrated into EDI Manager
- No digital signature
- Automatism
- Transparent use
- ERP integrated

Galion Dematerialization
